

PRECISION LOGISTICS & EFFICIENT SUPPLY CHAIN SOLUTIONS

DELIVERING RELIABILITY & PROFICIENCY IN GLOBAL TRADE

MISSION

Edex12 is dedicated to providing highly precise and significantly risk-reduced supply chain management solutions to enhance the operational efficiency of global retail and commodity trading sectors.

VISION

We aim to stand tall among the world's leading innovative and secure supply chain solutions providers, propelling sustainable growth and creating enduring value for our esteemed clients and partners.

OUR UNIQUE CONTRIBUTIONS TO THE WORLD

ADVANCED TECHNOLOGY

Utilization of cutting-edge logistics and warehousing technology to ensure efficiency and accuracy.

CUSTOMER SERVICE EXCELLENCE

Dedicated support teams provide personalized and responsive service to meet client needs.

INNOVATIVE SOLUTIONS

Tailored logistics solutions designed to optimize supply chain performance and reduce costs.

ZERO CARBON OPERATIONS

Edex12 has mapped its carbon footprint and is officially listed with ACX (Air Carbon Exchange) in Abu Dhabi. This enables us to offset not only our internal carbon footprint, but also our customers' operational carbon footprint, helping us achieve corporate sustainability key performance indicators as a carbon-free supplier.

Edex12 offers comprehensive global supply chain solutions, enhancing sustainable 3PL capabilities with unique software that minimizes risks and adds value for customers.

OUR SERVICES

CONTAINER CARRIAGE

We offer reliable and efficient container transportation services, ensuring safe handling and timely delivery at over 50 ports worldwide. Our network and partnerships enable us to provide seamless cross-border transport solutions.

COMPREHENSIVE WAREHOUSING

With over 5 million sqft of secure warehousing space worldwide, we provide comprehensive storage solutions, including inventory management and distribution services, all integrated with advanced warehousing systems.

LAST-MILE SOLUTIONS

Our last-mile delivery services ensure that goods reach their final destination promptly and securely. We leverage a network of local carriers and advanced route planning technology to optimize delivery times.

HEDGING FREIGHT RATES

We offer financial risk management services through freight rate hedging, helping clients stabilize their shipping costs and protect against market volatility.

HOW OUR SERVICES HAVE HELPED OUR CLIENTS

CASE STUDY 1 Redox (Food Chemicals)

Client Need:

Increase transparency on inventory control and faster order fulfilment.

Edex12 Solution:

Implemented advanced warehouse management software, allowing live inventory tracking and real-time reporting. This enabled Redox to track inventory by PO, supplier, batch code, and more. As a result, order fulfilment speed increased by 75%.

CASE STUDY 2 Geodis (Beverage Industry)

Client Need:

Absorb volume spikes on ocean container and terminal services.

Edex12 Solution:

Provided real-time container tracking and managed volume spikes with strong capacities and daily updates. This enhanced lead time analysis, procurement processes, and shipping schedules for Danone's supply chain.

CASE STUDY 3 Sharp Wholesale International (Paper)

Client Need:

Manage shipments from Germany and handle paper reels efficiently.

Edex12 Solution:

Utilized EDI integration and warehouse management systems to ensure precise handling, damage control, and value-added services like rewinding and labelling for specific markets.

RISK MITIGATION INITIATIVES

CARBON FOOTPRINT MAPPING

Officially listed with ACX (Air Carbon Exchange) in Abu Dhabi, actively offsets both internal and customer operational carbon footprints, promoting corporate sustainability.

FINANCIAL RISK MANAGEMENT

Through freight rate hedging, Edex12 mitigates financial risks by stabilizing shipping costs and protecting clients against market volatility.

ADVANCED WAREHOUSE MANAGEMENT SYSTEMS

Implementing advanced systems for live inventory tracking and real-time reporting enhances transparency and control, reducing operational risks.

EDI INTEGRATION

Utilization of Electronic Data Interchange (EDI) integration ensures precise handling, damage control, and value-added services, minimizing risks associated with logistics.
